

2020 Jeep Gladiator Rubicon Expedition Build

Built to Explore. Engineered to Go Anywhere.

This isn't just a Jeep Gladiator—it's a professionally built, fully self-contained overland expedition vehicle designed for extended off-grid travel without compromise. Starting with a Sting Gray 2020 Jeep Gladiator Rubicon, every component has been carefully selected to maximize reliability, capability, comfort, and self-sufficiency.

With over \$100,000 invested in premium upgrades, this Gladiator is ready for everything from weekend adventures to multi-week expeditions across North America.

-

Expedition Ready

Every aspect of this Gladiator has been purpose-built to create a dependable, comfortable, and highly capable overland platform. Whether navigating remote backcountry trails, spending weeks off-grid, or embarking on cross-country adventures, this vehicle is equipped to support the journey.

Unlike many builds assembled with appearance in mind, this Gladiator was thoughtfully engineered using premium components from ARB, AEV, REDARC, Goose Gear, Alu-Cab, Clayton Off-Road, Falcon, Steer Smarts, FOX, WARN, and Method Race Wheels—brands trusted by serious overlanders around the world.

The result is a turnkey expedition vehicle requiring nothing more than fuel, food, and a destination. Every major system—from suspension and drivetrain to electrical, water, heating, recovery, communications, and camping—has already been completed to a professional standard.

For the next owner, this represents an opportunity to skip years of planning, sourcing parts, waiting on installations, and investing significant money into a build. Simply load your gear, point it toward the horizon, and start the adventure.
